

Indiana Telephone Privacy Act

I understand that motion 02-278 is addressing the issue of telephone privacy. I was also informed by the Indiana Attorney General that the Federal Law being considered is significantly less strict than the Indiana policy. I would like to voice my opinion that the Indiana Law is not too strict in that non-profit organizations may still solicit donations, but I no longer receive annoying phone calls from telemarketers or other local companies (i.e. – roofers, window replacement, etc...) soliciting business. Please either allow each state to mandate requirements or consider a law at least as restrictive as Indiana's so that each and every citizen can enjoy their leisure time without unnecessary interruptions.

Thank you for your time and consideration in this matter.

Respectfully,

Jerry Hahin
